# Trajectory Solution

Fully integrated cloud-based modular software for complete control over the MoT solutions.

Trajectory Cloud Enterprise software is a user-friendly solution that allows you to track, manage, control, monitor and analyze your real-time supply, materials and equipment. So you know where parts are, when they're checked out, who has them and when they're over due. It also automates the flow of replenishment to your storeroom or external suppliers.

**NO** Data Corruption  
**NO** Viruses

**NO** Hard Drives  
**NO** Data Syncing

**NO** System Reboots/Conflicts  
**NO** Hassles

## Trajectory Analytics

Trajectory Analytics\* is a robust big data platform allowing you to visualize and analyze data from Trajectory Cloud and other sources. That helps you identify opportunities to optimize the flow of materials into your operation and optimize the performance of your end-to-end supply chain.

## Trajectory Mobile

See inventory levels and restocking requirements and make product changes on the fly to fully optimize your devices right from your smartphone or tablet. Perform cycle counts, view reports, manage alerts and more using Trajectory Mobile's intuitive user interface or voice commands.

## Trajectory Exchange

Trajectory Exchange allows you to import and export data on demand and connect with your existing systems (ERP, POS, CMMS, MES, etc.) in many ways.

## Trajectory Web Services

Trajectory Web Services provides import services and transaction data export services using standard Web Services specifications. It enables the seamless flow of data from Trajectory Cloud to and from your back-end operating systems like ERP, POS and other in-house applications.
